

Week-At-A-Glance 6-8th Grade

Week of 09/7/2020 - 09/11/2020

	Monday	Tuesday	Wednesday	Thursday	Friday
Standard and/or Objective	Students will be learning how all technology is made by humans. 8 th grade will be learning about the importance of surveys and how they can help businesses to improve on their products as well as their customer service. 6 th & 7 th Grade students will be doing a Math research worksheet, they will learn about important inventors and inventions with this worksheet. Students will be reading in their Paxton lab modules, but they cannot do any projects until they return their safety contract that is given to them for their signature and their parents or guardians signature. This contract is also listed under my webpage on the Trexler Website under forms. Please feel free to contact me if you have any questions or concerns at my email of donna.foy@onslow.k12.nc.us or leave me a message at school at 910-324-4414 and I can call you afterschool.				
“I can” statement	<ul style="list-style-type: none"> I can learn how all technology is made by humans. Also, it does not have to be electronic to be technology. I can social distance myself from others to keep myself as well as others safe. I can learn about surveys and do a worksheet and how these can help businesses to improve their products as well as customer service. I can do research and complete the math worksheet to learn about famous inventors and their inventions. I can take notes in my engineering design journal we made in class. 				
Assignments Activities	<p>8th Grade Students will complete a worksheet and learn about surveys and how they can help companies to grow and improve their products and their customer service department.</p> <p>7th Grade Students will do research and complete a Math worksheet to learn about famous inventors</p>	<p>8th Grade Students will complete a worksheet and learn about surveys and how they can help companies to grow and improve their products and their customer service department.</p> <p>7th Grade Students will do research and complete a Math worksheet to learn about famous inventors and their inventions.</p> <p>6th Grade</p>	<p><u>REMOTE LEARNING</u></p> <p>6-8th Grade will continue to work on Paxton days at home. Remember if you have problems getting things to post on teams, just send it to my email at donna.foy@onslow.k12.nc.us</p> <p>I will remotely talk to each class on line.</p> <p>Your Do Now this week is list the steps of the technological systems model. (Remember it has to be in order).</p>	<p>8th Grade Students will complete a worksheet and learn about surveys and how they can help companies to grow and improve their products and their customer service department.</p> <p>7th Grade Students will do research and complete a Math worksheet to learn about famous inventors and their inventions.</p>	<p>8th Grade Students will complete a worksheet and learn about surveys and how they can help companies to grow and improve their products and their customer service department.</p> <p>7th Grade Students will do research and complete a Math worksheet to learn about</p>
